Re: 61-40-740 Repurpose vehicle 79065 for a Mechanic Service

In the current budget we budgeted \$45,684 for a service bed. We initially planned to repurpose an existing truck to serve as a mobile mechanic/service truck; the budgeted amount was for a new bed to be installed. After Tyrel was hired as the Shop Supervisor we re-evaluated some of our plans and felt this was no longer a need and we could continue to operate as we have been, and tow all our equipment back to the shop for service or repair.

As part of the new shop we plan to budget for a 30,000LB lift to allow the mechanics to hoist our large trucks into the air to allow them to work under them without having to lie on the floor, as they do now. The budgeted amount for the lift would be \$35,000. We have provided the specs for the lift to Lundahl's so the footings could be poured as part of the new construction.

So at this time we are requesting to re-appropriate some of the monies from the service bed to the lift, so we can order the lift and have it installed when the new facility is ready.
