Re: Venture Academy Presentation

During the past six weeks the Venture Academy Jr. High School age students have studied community building, local government and local land use policies. The classes were divided into groups of 3 or 4 and asked to identify property inside and outside of North Ogden and prepare a recommendation for the future development of the property.

Specifically, they were asked to discuss how their recommendation will impact the following:

- 1) The surrounding area;
- 2) Traffic;
- 3) Financial; and,
- 4) The City's personality.

The top four groups have been selected to present their recommendations to you. It has been my privilege to work with these talented students and their teachers over the past few weeks. I think you will enjoy their presentations.
