

NORTH OGDEN CITY CORP. 505 East 2600 North 782-7211
MAYOR AND CITY COUNCIL

Letters, Calls, and E-mails - The Council Members and Mayor welcome your input and attendance at council meetings. Meetings are held on the 2nd and 4th Tuesdays of each month at 6:30 p.m. and work sessions as needed on the 1st Tuesday of each month. Check the City website for changes.

<u>Mayor Richard Harris</u>	940-1882	<u>rharris@nogden.org</u>
<u>Council Member Kent Bailey</u>	782-7807	<u>kbailey@nogden.org</u>
<u>Council Member Wade Bigler</u>	645-3318	<u>wbigler@nogden.org</u>
<u>Council Member Justin Fawson</u>	737-2321	<u>jfawson@nogden.org</u>
<u>Council Member Cheryl Stoker</u>	782-9302	<u>cstoker@nogden.org</u>
<u>Council Member Brent Taylor</u>	628-3848	<u>btaylor@nogden.org</u>

THANK YOU TO ALL THAT MADE CHERRY DAYS THE HUGE SUCCESS IT WAS. WE COULDN'T HAVE DONE IT WITHOUT ALL OF OUR WONDERFUL VOLUNTEERS, BUSINESSES, AND STAFF.

MUNICIPAL ELECTION

2013

Notice of Primary Elections for City Council:
Early voting will be held at the North Ogden City Offices located at 505 E 2600 N
July 30 – August 2, and August 5- August 9
during normal business hours, 8am – 5pm.
There will not be a Mayoral Primary Election.

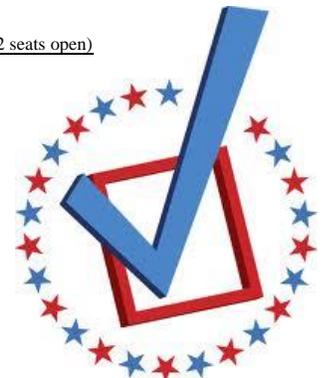

CANDIDATES FOR THE MUNICIPAL ELECTION

Mayor: 4 year term

Wade C. Bigler
Brent Taylor

Council Member: 4 year term (2 seats open)

David L. Gordon
Steven D. Huntsman
Brian G. Russell
Scott C. Russell
Lynn Satterthwaite
Phillip Swanson
James D. Urry

UTILITY RATES INCREASING BEGINNING JULY 1, 2013

The City Council passed the Fiscal Year 2013-2014 budget on June 11, 2013 which included a rate increase for several utilities. The rate increases were approved to help offset rising costs and to also save for future capital projects (i.e. replacement of utility lines, wells, equipment etc). The following are the rate increases which were approved:

- Water - \$.49
- Sewer - \$3.94
- Storm Drain - \$.26

The total increase will be \$4.69 per month and the increase will appear on the bill received in August.

North Ogden's City Offices

will be closed on Thursday, July 4, 2013.

NORTH OGDEN POLICE DEPARTMENT – 515 E 2600 N – 782-7219

Over the last couple of years, there have been a few changes to the State of Utah’s fireworks laws. Just to clear up any questions, the latest legal updates allow for Class “C” fireworks (those that can be legally purchased from a licensed dealer in the State of Utah) can be discharged between July 1st and July 7th, between 11am and 11pm (with the ending time extended to midnight on the night of July 4th), and again from July 21st to July 27th, between 11am and 11pm (with the time extended to midnight on the night of the 24th of July). They can be sold anytime from June 23rd through July 27th, but can only be discharged during the above listed dates and times. Class “C” fireworks are also permitted between 11am on December 31st and 1am on January 1st, as well as between 11am and 1am on Chinese New Year’s Eve. Anyone found

discharging fireworks outside of the above seven day period around the 4th and 24th of July, or over the New Year’s and Chinese New Year’s holidays is in violation of state law. Please also be mindful of where you launch your fireworks and the surrounding areas. Our area is very dry this year, and one stray firework can cause a disaster. Because of the hazardous conditions, restrictions have been put in place that restrict where fireworks are permitted. Please check with North Ogden City’s website, www.northogdencity.com for updates on fireworks-restricted areas before you embark on your holiday enjoyment.

FLOOD PLAIN INFORMATION

Questions regarding flood zones should be directed to Gary Kerr. FEMA flood maps are available for your review in our office. We also have elevation certificates.

1. Money spent with local businesses stays in the community.
2. Small businesses create more jobs.
3. Local businesses give the community its unique character.
4. Small business owners invest more in the community.
5. Local merchants provide better customer service.
6. Small businesses increase competition and provide more choices.
7. Locally owned businesses leave a smaller carbon footprint.
8. Entrepreneurs settle in communities that support local business.
9. Shopping local saves you money!
10. Shopping local retains our community.

COMMUNITY SERVICES

2705 N 550 E – 737-0587

BOYS 1ST & 2ND GRADE BASKETBALL
Registration: August 1st – August 20th

Session 3:July 8 – July 18

Session 4:July 22 – August 1

Session 5:August 5 – August 15

FLICK N FLOAT!

Saturday July 13th – 9:15pm. North Shore will be presenting Disney’s “Finding Nemo.” Beat the heat! Bring your inner tubes and pool floats and come enjoy the show!

Price: \$4.00

Season Pass Holders: \$2.00

It is estimated that more than one billion water bottles a year are deposited in trash bins. North Ogden City encourages residents, business owners and visitors to recycle their bottles instead of putting them in the trash. This small effort can help avert a serious environmental problem such as clogged landfills and air pollution. Plastic bottles burned with regular trash create toxic smoke and fumes, causing a health risk for humans and “greenhouse gases” which attack the ozone layer.

Cross Connections Can Be Deadly!

The North Ogden Water Department is proud of the drinking water it provides. Spring and well water is piped to reservoirs where it is carefully treated with chlorine by trained and certified experts to be sure that it is safe for you to drink. After treatment, the water is then delivered to you through a long series of pipes called a distribution system.

What is a CROSS CONNECTION?

Polluted water doesn't belong in your water system but it can end up there if you are not careful. A cross connection is a link between the drinking water supply and any pipes or fixture that may contain polluted water. You wouldn't want to turn on your faucet and find antifreeze or soapy water coming out, would you? A cross connection can be an open pathway for pollution to get into your drinking water. Backflow is the term used by the North Ogden Water Department to describe how dirty water, chemicals and other contaminants can enter the drinking water supply. Backflow means that the liquid is going the wrong direction in the pipe and that means the dirty water can get into the water line.

What happens if polluted water gets into the drinking water supply through cross connection? Polluted water can spread diseases such as typhoid, polio dysentery and hepatitis. Chemicals can be poisonous. Some types of contaminants can cause damage to the water distribution system, your plumbing fixtures, and water piping.

How can backflow be prevented? The North Ogden Water Department is doing a lot of make sure backflow doesn't happen. Water pressure is kept as high as possible all the time, and customers are notified when the water will be shut off if at all possible, so they won't be caught in the middle of an activity without any water. Backflow can also be prevented by installing special kinds of valves in the water system that will not allow the water to flow backwards. These special valves are called backflow prevention devices.

Can backflow really happen here? Yes. Toxic antifreeze in a solar heating panel leaked into the water system at Platte Canyon High School near Bailey, CO in 1982. Six students were treated for possible illness. A similar incident occurred at the Denver Federal Center in March 1985. Other cases of backflow have had more serious results. Pesticides, propane, sewage, and recycled car wash are among the contaminants that have appeared in the drinking water supplies of other cities.

The North Ogden Water Department has done its part in prevention by installing backflow prevention devices at community facilities, such as parks, schools and city buildings but we can't do it alone, we need your help. Hoses are the most common type of cross connection and they can produce serious results. Here are some things you can do in your home to protect your drinking water.

1. If you don't want to drink it, don't connect your water system to it.
2. Install hose bib vacuum breakers on outside faucets and laundry hookups. These small devices will prevent back-siphon, and they are available at local plumbing supply stores.
3. Create your own air gap. The faucets in your home are built with an air gap to prevent water in your sink or tub from being siphoned into the drinking water system. An air gap is a vertical space (at least two inches) through the air between the end of the faucet or hose and the top of the sink or container. Never submerge a hose, water line or faucet. Always let the water run through an air space before it enters a container.
4. Use extreme care with your garden hose. Do not use your hose to flush your automobile radiator (antifreeze is poisonous) or to clean out sewer traps and clogged drains. Do not use hose-connected sprayers or scrubbers.
5. If you have a solar system, swimming pool, hot tub, darkroom, lawn sprinkling system, evaporative cooler, irrigation well (or use secondary water for irrigation), call the North Ogden Water Department at 782-8111 to arrange for a trained operator to check your system for cross-connections.
6. Good, clean drinking water doesn't just happen, it takes a lot of work. The North Ogden Water Department is doing everything possible to keep the water safe while keeping cost down. Do not let all that work go to waste by allowing contaminants to enter your drinking water system.

NORTH VIEW SENIOR CENTER – 485 E 2550 N – 782-6211

Monday

830a Ceramics
 845a Magic Workout

COMMUNITY EMERGENCY RESPONSE TEAM

Summer is the time of year when we tend to experience more than our share of disasters. This year has been especially dry, and with the low humidity comes an increased risk of fires. In the event of a fire or other disaster, who do we always see up front and center, helping both victims and emergency workers alike? It's the people in the green C.E.R.T. vests. For those of you who have received Community Emergency Response Team training in the past, we thank you for your willingness to come forward and help your neighbors. If it's been a while since you're been through the training, North Ogden City and Weber County both hold regular training opportunities. We invite you to take some refresher courses now, because when the inevitable disaster strikes is not the time to wish you had brushed up on your skills. If you have not received C.E.R.T. training, but would like to learn how you can prepare yourself and your family for a disaster, and also learn how you can help your neighbors, we invite you to become C.E.R.T. certified. Please contact the North Ogden Police Department at 801-782-7219 for upcoming training dates and times. These can also be found on our Facebook and Twitter pages, www.facebook.com/northogdencert and www.twitter.com/northogdencert.

**NORTH OGDEN'S CITY
 OFFICES WILL BE
